

Lifting of the cross ownership ban is greatly detrimental to the People of America who rightly own the PUBLIC airwaves. This is a sad state of affairs that this country is in already, where station conglomeration is a way of life for you business shills. Your position is terribly transparent, to the point that several companies are already violating the ban in anticipation of your folding to them. Instead of prosecuting them, or taking any actions whatsoever to make them comply with the LAW, you instead are making proclamations about how you'd like a Mercedes. Inappropriate behavior. Stop sucking up to the corporate interests who financing this unethical administration and congress and do what is right for the people--Maintain the already diminished level of diversity instead of eliminating it altogether. This monopoly climate will not and cannot foster diversity without some intervention from the gov't.
